PAYTM HACKATHON 2026 · AI-POWERED FINANCIAL JOURNEYS

Parivaar Cover

Finds the best-value mix of health policies for your whole family, from kids to grandparents.

Team Prometheus

PROBLEM STATEMENT

Insuring three generations is guesswork

Rahul's family, Pune

- R **Rahul, 36**
- S **Sneha, 33**
- A **Aarav, 6**
- M **Mohan, 64** *diabetic*
- L **Lata, 60**

What Rahul has to decide

1. One floater for all five, or separate plans for his parents?
2. Is a super top-up worth adding, and at what deductible?
3. Which of hundreds of plans, from dozens of insurers?
4. What do co-pay, room-rent caps and waiting periods cost him?

Agents push one big floater and comparison sites rank one policy at a time, so no one works out the mix for the whole family.

~40%
of health spending in India is paid out of pocket
National Health Accounts 2021-22

44%
of claims rejected or only partly paid
LocalCircles survey of policyholders, 2023-25

~12%
medical inflation in 2024, about 3x general inflation
Milliman

PROPOSED SOLUTION

From family details to the right policy mix

01

Talk

Chat or speak in English, Hindi or a regional language. Share each member's age, health, city and budget, plus any office cover.

02

Read the fine print

AI has already turned every policy wording into comparable data: room rent, co-pay, waiting periods, sub-limits, network hospitals.

03

Optimise

A solver tests thousands of floater, individual and top-up combinations and picks the most cover per rupee within budget.

04

Explain and buy

Each pick comes with a plain-language reason and its catches. Buy every policy in one Paytm checkout, with EMI if needed.

About 10 minutes from first question to recommendation, inside the Paytm app.

PROPOSED SOLUTION · RAHUL'S FAMILY

Rahul gets 4x the cover for ₹11,000 less

THE USUAL PICK

One ₹25L floater for all five

₹1,18,000

a year

- Five people share one ₹25L pool
- Priced on Mohan's age and diabetes
- Diabetes waiting period of 3 years

Total cover **₹25L**

PARIVAAR COVER'S MIX

Five policies built for this family

₹1,07,000

a year

R S A	₹10L family floater	**₹21,000**
R S A	₹50L super top-up, ₹10L deductible	**₹4,500**
M	₹10L senior plan, 1-year diabetes wait	**₹41,000**
L	₹10L individual plan	**₹24,500**
M L	₹25L super top-up, ₹10L deductible	**₹16,000**

Total cover **₹1.05 crore**

Claim check: a ₹6L heart procedure for Mohan in year 2 is covered by the mix. With the usual pick it waits until year 4.

Illustrative premiums for a Pune family, rounded. Real quotes depend on the insurer and medical tests.

TECHNOLOGY / TECH STACK

How it's built

Channels Where families use it	Paytm mini-app (React Native)	Web (React) · Voice
AI layer Talks, reads policies, explains	Claude Sonnet 5.5	Bhashini / Sarvam AI (Indian languages)
Decision engine Builds the mix	Python + FastAPI	Google OR-Tools solver · Claim simulator
Policy data Every plan as structured data	PostgreSQL + pgvector	PDF parsing pipeline · Human review
Integrations Quote, pay, issue	Paytm Insurance Broking	Paytm KYC & payments · Lending partners (EMI)

Trust and compliance

- DPDP Act consent
- Encrypted health data
- Audit log for every recommendation

Prices and picks come from the solver. The LLM explains them and cites the policy clause.

USP

How it compares

	Insurance agent	Comparison site	Parivaar Cover
Recommends a mix of policies for the whole family	*Sometimes*	✗	✓
Compares plans across insurers	*Partly*	✓	✓
Explains the fine print before you pay	*Partly*	*Partly*	✓
Shows your out-of-pocket cost for real treatments	✗	✗	✓
Talks in your language, by voice	✓	✗	✓

Runs inside Paytm, so KYC, payments and renewal reminders are already in place.

IMPACT & BENEFITS

Who benefits

~10 min

from first question to recommendation (target)

4x

the cover for ₹11,000 less in Rahul's case

3 to 5

policies per family, instead of one

Families

- Decide in one sitting
- Parents get proper cover (no age cap on new policies since 2024)
- See waiting periods and caps before paying

Paytm

- Bigger ticket per household
- Renewals and yearly check-ups bring families back
- Uses Paytm's KYC, payments and lending

Insurers

- Customers matched to the right product
- Fewer disputes at claim time
- Lower cost to acquire customers

BUSINESS MODEL

Free for families, paid by insurer brokerage

Brokerage

Insurers pay brokerage on each policy via Paytm Insurance Broking (IRDAI licensed to 2029). A family buys 3 to 5.

Renewals

Health cover renews every year. A yearly check-up re-runs the optimizer and keeps the family on Paytm.

Premium EMI

Lending partners split large premiums into monthly payments. Paytm earns a share.

B2B API

Employers and other distributors license the optimizer.

YEAR 1 ILLUSTRATION

50,000
families

× ₹70,000
average yearly premium

= ₹350 Cr
premium through Paytm

₹42 Cr
revenue at an assumed 12% brokerage, before renewals

Main costs: AI usage per session, keeping policy data current, insurer integrations.

Thank you
